1. Select a rubber stamp with a bit of detail. Stamps resembling stained glass, outlines and lacy patterns work well.
 2. Stamp onto card stock with black ink. Heat emboss using fine black embossing powder. Let cool.
 3. Spritz the [MicaColor™ Watercolor Palette](#) palette with water. This re-constitutes them and makes them ready-to-paint with.
 4. Use a [#4 Detail Paint Brush](#) to color in the stamped image. Add more water to the palette or brush as necessary.
